## ABOUT ME

---

I am a person who is hungry for knowledge, creativity, imagination and innovation. Every knowledge that I get is the basis for gaining the ability to create unlimited creativity that can produce imagination which can create an innovation. To get all that requires a foundation called credibility that is created because of integrity. For me integrity is like a plant seed without which no roots, stems, twigs, and fruit will be seen in the future. My principle is that we may lose everything in life, but we must not lose integrity.

## EDUCATION

---

**Perguruan Rakyat 1 Senior High School**

**Jakarta**

*XII – Social Sciences (Average Value: 82)*

*Graduation Date: May 2017*

- Organizations: Basketball Club

## WORK EXPERIENCE

---

**PT. Trisula Prima Agung**

**Depok, West Java**

*IT Support*

*April 2017 - Present*

- Installing a local internet network both for 15+ client users and for leaders (including sharing data and sharing electronic devices connected to the local internet network) using a "MikroTik" router.
- Monitoring internet network traffic from within the local network so that it remains in a stable condition (including blocking sites that are not allowed to be accessed by 15+ client users).
- Ensure that no client user uses a computer device to open a site/link or uses a flash drive/external storage for use on each computer without confirming with IT.
- Perform maintenance of the company's website including updating company content and website features for the benefit of the company using a dashboard built with the Laravel framework.
- Design themes/designs and feature flowcharts for Android and web-based applications to support security activities for >20 corporate clients and provide reports to IT leaders if problems occur in these applications.
- Monitor the traffic from >100 users outside the local network (application users) on server computers with the "MikroTik" router.
- Perform an analysis if there are problems with the use of the application based on reports from client users.
